

Sprint #01 Review

Sprint: Sprint 01

Date: 06/09/2020

Time: 09:00PM

Scrum Master: Jia Bang Vuong

Product Owner: Sophia Nguyen

Development team:

Jessica Michelle

Jacob Morris

Han Chien Leow

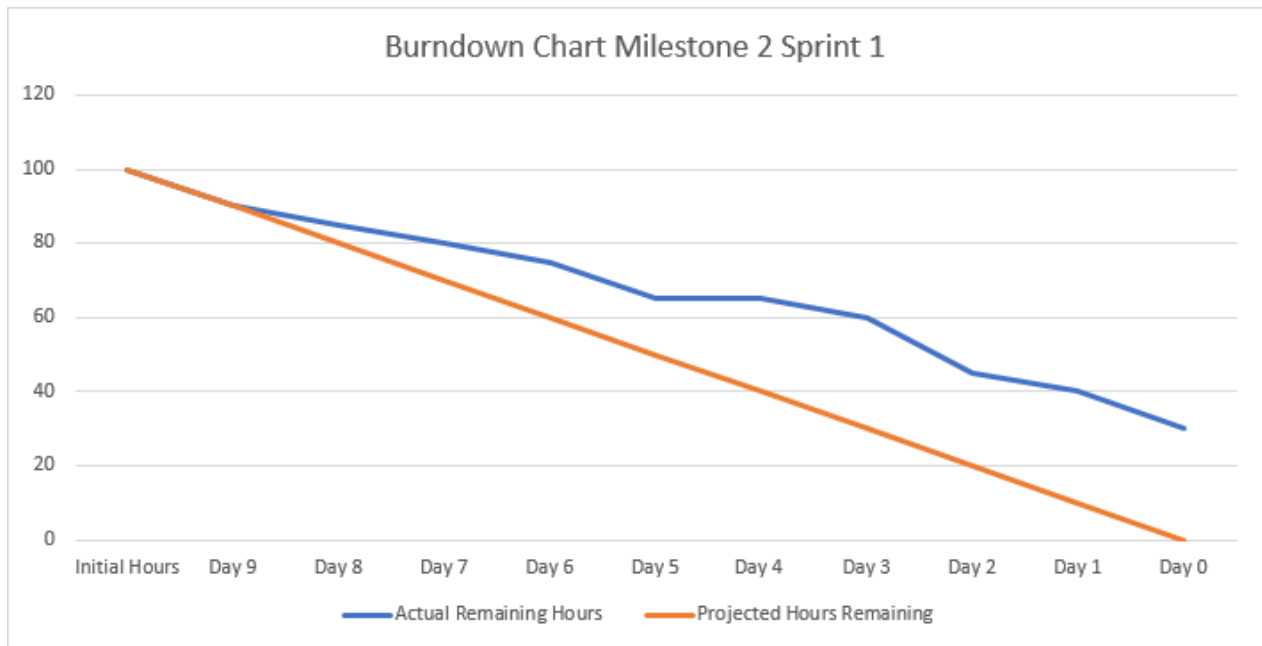

Sprint Goals

The goals of the sprint was to implement sign-in, sign-out and registration functionality in the backend. For the front end, it was to display webpages regarding each functionality. As of writing this review, the front end is capable of displaying webpages for the functionalities, although it has not been successfully connected to the backend. For the backend, sign-in and sign-out functionality has been completed, and the registration functionality is being tested.

Status Overview

In terms of the progress achieved throughout sprint 1 of milestone 2, some work has done. For the backend, sign-in and sign-up functionality has been completed, and the registration functionality is currently being tested at the moment of writing. For the backend, the webpage display for each functionality has been completed, and the validation for each webpage and functionality has been mostly completed. The quick start text file is currently being written.

Sprint Statistics

From the burndown chart that is shown above, it is immediately noticeable that some of the work expected to be completed during this sprint remains. As seen on the blue line, which depicts the amount of actual work done over the sprint, although there was a slow start to the sprint workload, with from 100 to 75 hours of work left, the development team increased their work efforts within the last four days of work, from 60 to 30 hours of work left.
