

Meeting minutes

Standup Meeting

17/09-4:00pm

Present:

Jia Bang Vuong

Sophia Nguyen

Apologies:

Jacob Morris

Han Chien Leow

Jessica Michelle

Agenda:

Points:

Progress since last meeting

As a group:

Jia has completed the writing of four JUnit tests, and has pushed his work onto his branch. He has also pulled from Han's branch, which had been updated yesterday by Han. Jia is continuing to work on the database section for the booking and business tables.

Sophia is still working on linking the front end and backend.

Issues:

An issue that Jia currently has is fixing issues regarding foreign and primary keys for the business and the business_workers tables. The problem is that the keys are of different variable types, and Jia should be able to fix it by tonight, or at latest, the end of the week.

In terms of continuous integration, Jia has made a private repository which will be mirroring the actual project repository. In the private one, Jia will be adding CircleCI to it and documenting each push in terms of fail or success.

Sophia has had some back end problems in terms of completing the connection of front and back end, but should be able to finish it off with help from the other team

Actions:

- **Next meeting is Monday 4PM**
