

Meeting minutes

Standup Meeting

14/09-5:20pm

Present:

Jia Bang Vuong

Apologies:

Jacob Morris

Jessica Michelle

Sophia Nguyen

Han Chien Leow

Agenda:

Points:

Progress since last meeting

As a group:

Backend:

Jia is nearly finished with adding the base booking related classes, such as the bookingRepository and the bookingService classes. After finalising those classes, he plans on moving to add booking tables into the database via the sql files.

Issues:

An issue that Jia is currently facing, is a more general issue regarding continuous integration, as he is unsure as to what would be the best implementation of it in terms of efficiency, as he has had no prior experience dealing with it. Another issue is that Jia is unsure on how to properly add a booking table and relations regarding booking into the database.

Actions:

- **Next meeting is Wednesday 4PM**

- By the next meeting, Jia expects to atleast solve the issue regarding the booking table, and hopefully commit and push all of his work onto his branch, and then form a pull request to the develop branch.
