

Meeting minutes

Standup Meeting

16/09-4:00pm

Present:

Jia Bang Vuong

Sophia Nguyen

Han Chien Leow

Jessica Michelle

Apologies:

Jacob Morris

Agenda:

Points:

Progress since last meeting

As a group:

Han has not been able to complete much work due to obligations with other subjects, but is confident with pushing the finalised work from the previous sprint onto the main branch. Sophia has finished writing front end code to connect with the backend regarding sprint 1 work, but needs Han to push his work for further testing. Jessica has been working slowly and has been writing up Mocha and Junit tests. Jia has been finished with the base booking classes and is halfway through writing the service/business classes.

Issues:

Jia is somewhat confused with writing annotations onto the business and booking models regarding the table and unique constraints. He is going to try and resolve it tonight, or by the next meeting.

The group has not worked with circleci, aws or docker, and are nervous and anxious as to how to approach it. Each member is going to look into one of the three programs

each, and hopefully atleast have one of the three implemented into the project by the end of the week.

Actions:

- **Next meeting is Thursday 4PM**
- **Prepare for the Thursday meeting at 7.20PM**
