Meeting minutes

Standup Meeting

05/09-9:00pm

Present:

Jia Bang Vuong

Sophia Nguyen

Apologies:

Jacob Morris

Jessica Michelle

Han Chien Leow

Agenda:

Where is everyone up to

Points:

Progress since last meeting

 Backend: some issues with accessing backend

  -SQL needs to be converted to MySQL to clear up elective issue showing up on VS Code

  -fixed on the data.sql and sept.sql file,

 Frontend: exported code from Figma to HTML, tweaked to display output.

Issues:

 -Config file includes two methods doing similar things- this to be edited and cleared so that backend can be accessed

  - The first method is too basic, the second is more complex, but is causing problems with viewing webpages

Actions:

-Testing needs to be written

     -Min 2-3 JUnit/ frontend tests on the sections we are working on

Front end layout needs to be refined. While export from Figma to HTML has resulted in visual layout, functionality needs to be restored to login, signup, main and dashboard pages.

Store.js file needs to be completed to aid in the connection of front end to back end.

Add comments to code that we have worked on
